Allowable Subject Matter

In regards to claim 1, none of the reference of record alone or in combination disclose or suggest an apparatus for forming a first state and a second state alternatively and sequentially on an optical recording medium in response to input data having a first level and a second level less than the first level, respectively, in an optical recording apparatus, the apparatus comprising:

a recording waveform generating unit generating a recording waveform which includes:

a first multi-pulse corresponding to the first level of the input data and having first pulses alternating between a low first multi-pulse level and a high first multi-pulse level,

a second multi-pulse preceding the first multi-pulse and corresponding to the second level of the input data, the second multi-pulse having second pulses alternating between a low second multi-pulse level and a high second multi-pulse level,

a cooling pulse connecting another first multi-pulse preceding the second multi-pulse and which extends from a trailing one of the pulses of the another first multi-pulse to a leading one of the pulses of the second multi-pulse, the cooling pulse forming a portion of the first pulses of the another first multi-pulse and a portion of the second pulses,

the leading one of the pulses of the second multi-pulse set to the low second multi-pulse level,

a power level between an end of the second multi-pulse and a first one of the pulses of the first multi-pulse set to the high second multi-pulse level, and the high second multi-pulse level set between the low and high first multi-pulse levels.

Therefore, claims 1-8, 11, 12 and 14-24 are allowed.
